

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

PORTO RICO.

*Sanitary report for Mayaguez.*SAN JUAN, PORTO RICO, *May 13, 1899.*

SIR: I have the honor to submit the following report of an inspection of Mayaguez, Porto Rico:

This port is situated upon the western end of the island and commercially is the third in importance. Like Ponce, the city proper is located a mile or so inland from the Playa, but has been built up in the intervening space. The population of the city is about 18,000 and of the district about 30,000.

The streets are wide and clean, unpaved, with a fair incline for drainage. The buildings are of a substantial character, brick, stone, and cement, as usual in Porto Rico, and are well adapted to this tropical climate.

The city possesses an electric-light plant, gas, and waterworks. The latter supply is fair in quality and quantity, and is taken from a mountain stream a couple of miles away, the pressure being by gravitation. This system requires both reservoirs and filter beds. Vegetable gardening is carried on by irrigation, and although commercially quiet for the past few years, this city has a future as a shipping point for a rich coffee and sugar district, the best cultivated region upon the island.

The harbor is an open one, and freight and passengers are landed by means of lighters. Toward the northern end an iron pier was partially constructed, to fairly deep water, by the Spanish authorities, but the ironwork is rapidly oxidizing for want of paint and tar protection. A breakwater is also needed upon the water side, to protect vessels lying at the wharf.

The customs receipts since our military occupation, August 10, 1898, are in round numbers, \$115,000.

A local military board of health, with Major Cooper as president, and Dr. Nussar, city physician, as secretary, acts in conjunction with the alcalde and city council. The usual scarcity of funds prevails, but the streets are well policed in a sanitary way, and the cesspools are kept within bounds. The slaughter house is located in an objectionable section of the city, and should be removed to the one extremity of the water front, or a crematory provided for burning the refuse, as the blood and washings drain into a neighboring marsh, with the prevail-
